Paediatric Dosing Handbook

Reference	PAE-DOS-01 v2026
Owner	Paediatric Pharmacist
Approved by	Quality and Patient Safety Committee
Effective date	26/01/2026
Next review	26/01/2029
Applies to	All clinical areas of the Centre Hospitalier Saint-Aubin

1. Principles

Doses are calculated on the current body weight in kilograms. Use the weight measured at admission; never an estimate when a measured weight exists. Express doses in milligrams and volumes in millilitres. Volumes are rounded down to the nearest 0.5 mL.

2. Paracetamol

Item	Rule
Single dose	15 mg/kg per dose
Interval	every 6 hours (minimum 4 hours)
Maximum doses	4 doses in 24 hours
Maximum daily dose	60 mg/kg per 24 hours, not exceeding 4 g
Maximum single dose	1 g
Oral suspension	120 mg in 5 mL (24 mg/mL)

A prescription above the single-dose or daily limit must not be dispensed; the pharmacist contacts the prescriber.

3. Ibuprofen

Item	Rule
Single dose	5 to 10 mg/kg per dose
Interval	every 6 to 8 hours
Maximum daily dose	30 mg/kg per 24 hours

4. Amoxicillin

Item	Rule
Standard dose	25 mg/kg three times daily
Maximum	1 g per dose

5. Governance, audit and training

This document is controlled. Printed copies are uncontrolled: the current version is held on the hospital document management system and a printed copy must be checked against it before use.

The document owner reviews the content at least every three years or earlier when national guidance, a serious incident or an audit finding requires it. Interim changes are approved by the relevant committee chair and recorded in the revision history.

Compliance is audited by the clinical audit department on a rolling sample of records. Results are reported to the quality and patient safety committee, which agrees actions with the ward managers and monitors their completion.

Staff who identify a deviation from this document, or a situation it does not cover, should discuss it with the senior clinician on duty and report it through the incident reporting system. Reporting is a learning tool and not a disciplinary process.

6. Revision history

Version	Date	Author	Summary of change
1.0	26/01/2021	Paediatric Pharmacist	First issue
2.0	26/01/2023	Paediatric Pharmacist	Triennial review; format harmonised
3.0	26/06/2025	Paediatric Pharmacist	Tables updated after clinical audit
current	26/01/2026	Paediatric Pharmacist	Review and re-issue

Annex A. Implementation notes

This document is controlled. Printed copies are uncontrolled: the current version is held on the hospital document management system and a printed copy must be checked against it before use.

Staff who identify a deviation from this document, or a situation it does not cover, should discuss it with the senior clinician on duty and report it through the incident reporting system. Reporting is a learning tool and not a disciplinary process.

Data protection: any patient information handled under this document is processed in accordance with the data protection policy of the hospital. Access to records is limited to staff involved in the care of the patient.

Compliance is audited by the clinical audit department on a rolling sample of records. Results are reported to the quality and patient safety committee, which agrees actions with the ward managers and monitors their completion.

The document owner reviews the content at least every three years or earlier when national guidance, a serious incident or an audit finding requires it. Interim changes are approved by the relevant committee chair and recorded in the revision history.

Equality and diversity: this document has been assessed for its effect on patients and staff with protected characteristics. Reasonable adjustments, interpreters and accessible formats are available through the patient experience team.

Where this document refers to a role (for example the ward pharmacist or the senior nurse), the post-holder on duty carries out the task or delegates it to a suitably trained colleague who remains accountable to them.

Training on this document is part of the induction programme for clinical staff and is refreshed through the annual mandatory training cycle. Agency and locum staff receive a short briefing at the start of their first shift.
