Procurement and payment policy

Approved by the Board on 15/01/2026

1. Purpose and scope

This policy defines how goods and services are ordered, received, invoiced and paid by Azur Marine Services S.A.M. It applies to all purchases made for the office and for the vessels under management, whatever the amount. It does not apply to payroll, social contributions and taxes.

2. Purchase orders

A purchase order (PO) approved in accordance with section 3 must be issued before any commitment towards a supplier flagged "PO required = Yes" in the supplier master file. Recurring services under a framework contract (berths, telecommunications, insurance, IT managed services, cleaning, provisions, crew agency) are exempt.

In an emergency affecting the safety of a vessel, the Master may authorise work verbally; a regularisation PO must then be issued within 2 working days.

3. Approval matrix

The approver is determined by the net amount (excluding VAT) of the PO. A higher level may always approve a lower amount.

Net amount of the PO (EUR)	Required approver	Current holder
up to 5,000.00	Operations Manager	Thomas Rinaldi
5,000.01 to 20,000.00	Finance Director	Claire Martin
above 20,000.00	Chief Executive Officer	Philippe Andrieu

4. Receipt of goods and services

Goods are received against a delivery note signed on board; services against a service report signed by the Master or the Chief Engineer. Partial deliveries must be recorded with the quantities actually received.

5. Invoice control (three-way match)

Before booking, each invoice is matched with the PO and the delivery note or service report. Quantities invoiced may not exceed quantities received. Prices may not exceed PO prices. VAT must be arithmetically correct and the invoice must carry the mandatory mentions.

Any difference is put on hold and notified to the supplier in writing.

6. Payments

Payments are made on or shortly before the due date. Payments before receipt of the invoice or of the goods are only allowed when a deposit or prepayment is expressly provided for in a signed PO or contract.

Any change of supplier bank details must be confirmed by a call-back to the telephone number recorded in the supplier master file, by a person other than the requester, before the next payment.

7. Period-end cut-off

Invoices received after the closing date that relate to goods or services delivered during the period are accrued. Goods or services received without an invoice are accrued at the PO price.
