Subject: Bilge pump failure on board M/Y Aurelia

Thomas,

The main bilge pump failed this morning while the guests were on board. Northstar Yacht Services sent a technician who replaced the pump this afternoon; the yacht is safe and the bilge alarm has been reset.

Given the urgency I authorised the work verbally. The office was closed, so no purchase order was raised. Northstar will send their invoice directly to accounts.

Best regards,
Capt. James Whitfield
Master, M/Y Aurelia
